Web3 Native Development

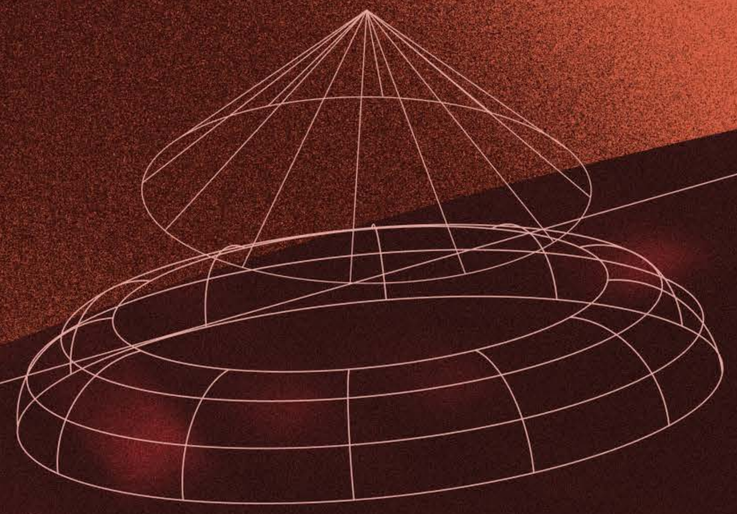
RAID GUILD

2025

www.raidguild.org

If you want to go fast, go *alone*.

If you want to go far, go ***together***



RaidGuild is a Web3 Native Development Agency. DAO-born. Battle-tested. Agile, always and deep where it truly counts.

We are 150+ developers, designers and strategists coordinating since 2019 and have delivered on-chain systems for many of the protocols and tools you use everyday.

Born to *Raid*

Web3 Native Development

- Deep Web3 expertise: smart contracts to UX.
- DAO-native: transparent, modular, async.
- Global, agile squads with low overhead.
- Smart escrow via SmartInvoice.
- Tokenomics, governance & system design baked in.

We're hackers, product managers, protocol engineers, and designers — we build for pleasure *and* profit.

A Raid's *Lifecycle*

Raider Types: *Support*
Apprentice: *New applicants*
Angry Dwarf: *Treasury Management*

Wizard: *Smart Contracts*

Web3 Native Development

1. Client Intake

A Consultation defines scope and budget.

RaidGuild returns with a proposal

2. Squad Formation

DAO forms a custom-fit project team

3. Escrow

You fund a SmartInvoice

We only get paid as Agreed conditions are met

4. Execution

Sprint-based async collaboration

5. Delivery + QA

Polishing

Battle-Testing

6. Release

Final sign-off triggers token release
